DEPARTMENT OF THE ARMY PERMIT

Permittee: **Mr. Dave Meghreblian, PotlatchDeltic Corporation**

Permit No.: **SWL-2017-00276-3**

Issuing Office: Department of the Army
Little Rock District
PO Box 867
Little Rock, Arkansas 72203-0867

NOTE: The term "you" and its derivatives, as used in this permit, means the permittee or any future transferee. The term "this office" refers to the appropriate district or division office of the Corps of Engineers having jurisdiction over the permitted activity or the appropriate official of that office acting under the authority of the commanding officer.

You are authorized to perform work in accordance with the terms and conditions specified below.

Project Description: The purpose of the project is to provide housing by developing a site for a residential subdivision to service Little Rock and surrounding areas. The project involves the construction of a 122-acre single family residential development referred to as Chenal Valley – Phase 30 and 31. Mechanized land clearing, grading, storm water detention, road construction, and residential home construction will take place using suitable equipment (such as excavators, dump trucks, and bulldozers). The project would impact (fill, culvert, and impound) approximately 3,722 linear feet of non-jurisdictional ephemeral stream; 933 linear feet of jurisdictional intermittent stream; and 0.8 acres of a jurisdictional forested wetland. Implementation of erosion and sediment controls at the site will minimize or eliminate water quality impacts, other than the planned fills, to receiving streams and wetlands, and will protect water quality in downstream waters. The filled streams would be rerouted through drainage features placed throughout the residential subdivision and ultimately flow into intermittent streams located off the property. The project shall be constructed as shown on the enclosed drawings, Sheet 3 of 3, dated October 2021.

Project Location: The proposed project is located in streams and an adjacent forested wetland associated with several unnamed tributaries that flow into the Little Maumelle River and ultimately the Arkansas River, in sections 24 and 25, T. 2 N., R. 14 W., Little Rock, Pulaski County, Arkansas.

Permit Conditions:

General Conditions:

1. The time limit for completing the work authorized ends on **December 31, 2024**. If you find that you need more time to complete the authorized activity, submit your request for a time

extension to this office for consideration at least one month before the above date is reached.

2. You must maintain the activity authorized by this permit in good condition and in conformance with the terms and conditions of this permit. You are not relieved of this requirement if you abandon the permitted activity, although you may make a good faith transfer to a third party in compliance with General Condition 4 below. Should you wish to cease to maintain the authorized activity or should you desire to abandon it without a good faith transfer, you must obtain a modification of this permit from this office, which may require restoration of the area.
3. If you discover any previously unknown historic or archeological remains while accomplishing the activity authorized by this permit, you must immediately notify this office of what you have found. We will initiate the Federal and state coordination required to determine if the remains warrant a recovery effort or if the site is eligible for listing in the National Register of Historic Places.
4. If you sell the property associated with this permit, you must obtain the signature of the new owner in the space provided and forward a copy of the permit to this office to validate the transfer of this authorization.
5. If a conditioned water quality certification has been issued for your project, you must comply with the conditions specified in the certification as special conditions to this permit. For your convenience, a copy of the certification is enclosed if it contains such conditions.
6. You must allow representatives from this office to inspect the authorized activity at any time deemed necessary to ensure that it is being or has been accomplished in accordance with the terms and conditions of your permit.

Special Conditions:

1. **The permittee shall notify the U.S. Army Corps of Engineers, Little Rock District (USACE-SWL), Regulatory Division, Evaluation Branch of any additional fill proposed in waters of the United States to construct the Chenal Valley – Phase 30 and 31 residential development. This includes all activities associated with the discharge and excavation of material in waters of the United States by the permittee or their subcontractors. In addition, all subcontractors shall be furnished and required to implement the general and special conditions of this permit and receive additional authorization from USACE-SWL for all associated activities in waters of the United States.**
2. **The permittee and their subcontractors shall place all construction debris, including any excess material, on uplands in such a manner to prevent it from entering or being discharged in any waterway. Implementation of erosion and sediment controls at the site will minimize or eliminate impacts and will protect water quality in downstream waters.**

3. In accordance with stipulations under the Clean Water Act's National Pollutant Discharge Elimination System, the permittee will prepare a construction site storm water pollution prevention plan (SWPPP) and implement it to prevent and minimize transport to downstream waters. The permittee shall implement appropriate erosion control methods indicated in the SWPP during all construction phases. Erosion control measures shall be maintained before, during, and after construction of the project. All disturbed areas and exposed slopes shall be adequately stabilized to prevent subsequent erosion and sediment transport.

4. Using the 2011 Little Rock Stream Method, USACE calculated that 2,904.3 stream credits were required to compensate for impacts (culvert, pipe, and impoundment) to 933 linear feet of intermittent stream channel. Using the 2002 Charleston Method with the SWL Addendum USACE calculated that 7.3 wetland credits were required to compensate for impacts (fill and impoundment) to 0.8 acres of forested wetland. Prior to beginning any authorized work, the permittee shall purchase 2,904.3 stream credits and 7.3 wetland credits from an approved mitigation bank with primary service in the project area. In accordance with 33 CFR 332.3(m), as proof that compensatory mitigation has been implemented prior to authorized work, the permittee must submit documentation of the purchase of the stream and wetland credits to the USACE-SWL Regulatory Division prior to beginning any authorized work.

5. If previously unknown cultural resources are encountered during work authorized by this permit, the permittee shall immediately contact USACE-SWL Regulatory Division and avoid further impact to the cultural resources until assessment by State and Federal cultural resource specialists is complete and USACE has verified that the requirements of 33 CFR Part 325, Appendix C, and 36 CFR Part 800 have been met. Cultural resources include prehistoric and historic archeological sites, and areas or structures of cultural interest that occur in the permit area.

6. The permittee will notify USACE-SWL, Regulatory Division, Enforcement Branch when the construction of the authorized project begins so that periodic compliance inspections can be performed.

Cumulative Impact	0.05 x $\sum AA_i$					

Note: For the Cumulative Impact factor, $\sum AA_i$ stands for the sum of the acres of adverse impacts to aquatic areas for the overall project. When computing this factor, round to the nearest tenth decimal place using even number rounding. Thus 0.01 and 0.030 are rounded down to give a value of zero while 0.051 and 0.09 are rounded up to give 0.1 as the value for the cumulative impact factor. The cumulative impact factor for the overall project must be used in each area column on the Required Mitigation Credits Worksheet below.

Priority Category	Tertiary	Tertiary				
Existing Condition	Slightly Impaired	Slightly Impaired

Dominant Impact	Fill	Impound/Flood				
Cumulative Impact	0 (Overall Cumulative Impact Threshold Not Met)

Impacted Area ^(AA)	0.1	0.7				
R x AA =	0.95	6.30				

Required Wetland Mitigation Credits = $\sum (R \times AA) =$

7.25

Notes:

SWL agrees with the GBMe's determinations for Priority Category, Existing Condition, Duration, Dominant Impact, and Impacted Area. Under Cumulative Impact, SWL figured the factor using the $0.05 \times \sum AA_i$ formula as described above and figured a factor of 0.0, which changes the Sum of r Factors and the R x A results and thus the final mitigation credits figure. Because W-1 presently functions as a wetland, SWL considers the Lost Type to be Type B (factor of 2.0) instead of Type C (factor of 0.2). Given these evaluations and determinations, the total number of wetland credits required if purchased from an approved mitigation bank that services the project area as a primary service area is 7.3 (rounded up from 7.25).

RE: 401 Water Quality Certification SWL 2017-00276-2-Meghreblian/Potlatch Deltic Corporation- Construction Activities, Pulaski County, Arkansas

Dear Colonel Noe:

The Division of Environmental Quality ("DEQ") has completed its review of the above referenced project for Dave Meghreblian/Potlatch Deltic Corporation, 7 Chenal Club Boulevard, Little Rock, AR, 72223 has requested authorization for work, including the placement of dredged and fill material in waters of the United States, associated with the construction of a 122-acre residential development. The site will be graded and 0.1 acres of a man-made wetland and 3,232 linear feet of streams will be permanently filled; 375 linear feet of streams will be culverted; and 0.7 acres of man-made wetland and 1,048 linear feet of streams will be impounded for storm water retention purposes. The project is located on unnamed tributaries to Little Maumelle River, in Sections 24 and 25, T 2 N, R 14 W, Lat. 34.78923, Long. -92.4496, Little Rock, Pulaski County, Arkansas.

DEQ has determined that there is a reasonable assurance that this activity will be conducted in a manner which, according to the Arkansas Pollution Control and Ecology Commission's Regulation No.2, will not physically alter a significant segment of the waterbody and will not permanently violate the water quality criteria.

Pursuant to §401(a)(1) of the Clean Water Act, the DEQ hereby issues water quality certification for this project: SWL-2017-00276-2/ADEQ No. 20190353 contingent upon the following conditions:

- 1) The applicant shall contact DEQ to determine if a Short Term Activity Authorization (STAA) is needed when performing work in the wetted area of any waterbody. More information can be obtained by contacting the Water Division Planning Section of DEQ at 501-682-0040.
- 2) The applicant shall implement all practicable best management practices (BMPs) to avoid excessive impacts of sedimentation and turbidity to the surface waters.
- 3) The applicant will take all reasonable measures to prevent the spillage or leakage of any chemicals, oil, grease, gasoline, diesel, or other fuels. In the unlikely event such spillage or leakage occurs, the applicant must contact DEQ immediately.

Division of Environmental Quality
5301 Northshore Drive, North Little Rock, AR 72118-5137
adeq.state.ar.us

- 4) The applicant shall limit construction to low flow periods as much as possible to minimize adverse effects on water quality and aquatic life.
- 5) If a construction site will disturb equal to or greater than one (1) acre and less than five (5) acres, the applicant shall comply with the requirements in Reg. 6.203 for Stormwater discharge associated with a small construction site, as defined in APC&EC Regulation No. 6. If the construction site will disturb five (5) acres or more, the applicant shall comply with the terms of the Stormwater Construction General Permit Number ARR150000 prior to the start of construction. BMPs must be implemented regardless of the size. More information can be obtained by contacting the NPDES Stormwater Section of DEQ at (501) 682-0621.

In issuing this certification, DEQ does not assume any liability for the following:

- A. Damages to the proposed project, or uses thereof, as a result of other permitted or unpermitted activities or from natural causes.
- B. Damages to persons, property, or to other permitted or unpermitted activities or structures caused by the activity specified in this certification.
- C. Design or construction deficiencies associated with this proposed project.

Please contact Mrs. Melanie Treat, at (501) 682-0040 if you have any questions regarding this certification.

Sincerely,

Bryan Leamons, P.E.
Senior Operations Manager, Office of Water Quality
